

Healthy Parent Carers Family Faculty working group meeting

(Room 1.27, South Cloisters, St Lukes Campus)

3 July 2018

Meeting notes

Attendees

PenCRU – Annie, Gretchen, Kath, Silvia

Family Faculty – Annette, John, Lynn

- The aim of this meeting was for Family Faculty members to review the first draft of the resource use questionnaire.
- Generally, the website questionnaires should:
 - Have a save option
 - Have a progression bar
 - Make it clear that participants don't need to answer all questions
 - Have the option to review all questionnaire before submitting
- Main comments on the resource use questionnaire included:
 - Better explanation of the fact that there are some questions relating to services which parent carers use and other questions on services for children that benefit the health and wellbeing of the parents.
 - Community-based NHS healthcare services should include those health improvement services that a GP can refer to, for example smoking cessation, and community mental health team.
 - The questionnaire should include a question about support parents may receive via your child's school
 - The questionnaire should include a question about online support, for example social media support groups.
 - The questionnaire is missing questions about whether the parent carer has taken time off work.
 - The question regarding use of voluntary or charity services should ask for the name and aim of sessions, rather than a generic description of the sessions.
 - Physical activity should feature as a service parents pay for.
 - Enabling services should feature in the section asking about services for children.
